Mark
I just realized that our next scheduled meeting of FONA is March 3rd? Anyway, I'll be out of town (from March 2-9) on a trip down to Baja - I did the mission statement if you still want to hold the meeting:

FONA Mission Statement

The Friends of the Nature Area's mission is to enrich our students' and communities' learning experience by offering opportunities in Environmental Education and Native American cultural studies that preserve, protect and restore our natural environment. Our goal is to develop curriculum and resources to meet this mission while providing safe and rewarding outdoor educational experiences. The Georgetown Nature Area should include not only the minimally managed nature reserve, but the amphitheater, restrooms and parking areas necessary for the use of the nature reserve. The endowment for maintaining and improving the nature reserve should include these portions of the infrastructure necessary for the use of the nature reserve, with the understanding that any fees generated shall be used for maintenance of both the infrastructure as well as the nature reserve.

Ray
